A

1980 CENSUS OF POPULATION AND HOUSING

COMPLETE COUNT TABLES
FOR
THE STATE OF CONNECTICUT

FORMAT: The report is divided into the following sections by geographic areas:

- Section 1. STATE OF CONNECTICUT
- Section 2. REGIONAL PLANNING AREAS
- Section 3. HEALTH SERVICE AREAS
- Section 4. LABOR MARKET AREAS
- Section 5. COUNTIES
- Section 6. MUNICIPALITIES
- Section 7. NON-CONTIGUOUS BOROUGHS AND CITIES

Within each section, data for each geographic area is summarized by a set of 55 tables, presented on three sequential pages as follows:

1. Characteristics of Persons
2. Characteristics of Households and Families
3. Characteristics of Housing Units

Within each section, the three page sets of tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Hartford. File codes are also listed with each area. Pages in this document are not numbered, to allow for reproduction in sections, and to allow the user to rearrange the order of the geographic areas.

FOOTNOTES: The footnotes are contained on single pages at the end of each section.

TABLE NUMBERS: The table numbers used are identical to those utilized by the U.S. Bureau of the Census on the summary tape files, printed reports, and microfiche. When more than one table number is shown with a table heading, the data in that table were combined or derived from two or more tables.

SOURCE: Summary Tape File 1A, Bureau of the Census, U.S. Department of Commerce

ISSUED BY: The Connecticut Census Data Center
Comprehensive Planning Division, Office of Policy and Management
80 Washington Street, Hartford, CT 06115, (203) 566-8285
April, 1982

ACKNOWLEDGEMENT: CENSPAC, a software package produced by the Bureau of the Census, was used to generate the tables contained in this report. The output code used was initially developed by the New Jersey State Data Center and modified by the Connecticut Census Data Center.

CONNECTICUT: 1980 CENSUS OF POPULATION AND HOUSING
Counts from Summary Tape File 1A, U. S. Bureau of the Census

12/81

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, Connecticut 06115
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from the questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonomous with a 100% sample. Information presented in this report is from the complete count, where each household was asked 19 basic questions on population and housing subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city block or a census tract. The tables presented in this report have been extracted from the first computer tape file of these summary tables. This file, called Summary Tape File 1A or STF 1A, contains the data from the complete count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(1) The count of households in the "complete count" (also called "100% sample") tabulations by definition equals the number of occupied housing units. In this document, the terms "households" and "occupied housing units" are used interchangeably.

(2) Vacant seasonal/migratory units are excluded from all other tabulation matrices.

(3) For the "complete-count" (also called 100% sample) tabulations, includes all persons in the category "other." For sample data, excludes those persons who have a write-in entry of an Asian & Pacific Islander group in the "Other" category.

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes: "Japanese," "Chinese," "Fillipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamantan," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "other" category.

(5) Relatives include: householder, spouse, and the questionnaire categories: "Son/daughter," "Brother/sister," "Father/mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown separately in the matrix.

(6) Nonrelatives include the questionnaire categories "Roomer, boarder," "Partner, roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.

(7) Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in unit." The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the phrase "Persons in unit" is used. Tabulations of "Persons in unit" based on sample data are not necessarily the same due to differences in the procedures used to inflate sample population and housing data.

(8) A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

(9) Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," Held for occasional use," and "Other vacant." Tabulations of "Other vacant" include all categories not shown separately in the matrix.

(10) This aggregate, along with the relevant count will permit the computation of a mean. For example, the aggregate value for the owner-occupied noncondominum units will yield the mean or average value when divided by the number of specified owner-occupied noncondominium units, and the aggregate number of rooms for occupied and vacant year-round units yields the mean or average number of rooms. (See footnote 14 prior to computing mean value).

(11) The noncondominimum value distribution is restricted to certain kinds of "owner-occupied" or "vacant for sale only" units. The following are excluded from the tabulations on value for noncondominimum units:
   A. Units at an address with two or more units
   B. Units on 10 or more acres
   C. Units with a commercial establishment or medical office on the property
   D. Mobile homes or trailers

Value is tabulated for all owner-occupied and vacant-for-sale condominimum units.

(12) Contract rent is tabulated for all "renter-occupied" and "vacant-for-rent" units except 1-family houses on a property of 10 or more acres. Units tabulated in the "No cash rent" category are all occupied housing units reported as "No cash rent" except one-family houses on 10 or more acres.

(13) Lacking complete plumbing (facilities) for exclusive use includes: Complete plumbing (facilities) but also used by another household, some but not all plumbing facilities, or no plumbing facilities.

(14) Multiply the aggregate value by $250 to obtain the true value. The tabulation was scaled by a factor of $250 for tally purposes.

SECTION 2. REGIONAL PLANNING AREAS

FORMAT: Within this section, data for each regional planning area is summarized by a set of 55 tables, presented on three sequential pages as follows:

1. Characteristics of Persons
2. Characteristics of Households and Families
3. Characteristics of Housing Units

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Capitol Regional Planning Area. File codes are also listed with each area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

CONNECTICUT: 1980 CENSUS OF POPULATION AND HOUSING
Counts from Summary Tape File 1A, U. S. Bureau of the Census

12/81

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, Connecticut 06115
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from the questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonomous with a 100% sample. Information presented in this report is from the complete count, where each household was asked 19 basic questions on population and housing subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city block or a census tract. The tables presented in this report have been extracted from the first computer tape file of these summary tables. This file, called Summary Tape File 1A or STF 1A, contains the data from the complete count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(1) The count of households in the "complete count" (also called "100% sample") tabulations by definition equals the number of occupied housing units. In this document, the terms "households" and "occupied housing units" are used interchangeably.

(2) Vacant seasonal/migratory units are excluded from all other tabulation matrices.

(3) For the "complete-count" (also called 100% sample) tabulations, includes all persons in the category "other." For sample data, excludes those persons who have a write-in entry of an Asian & Pacific Islander group in the "Other" category.

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes: "Japanese," "Chinese," "Fillipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamantan," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "other" category.

(5) Relatives include: householder, spouse, and the questionnaire categories: "Son/daughter," "Brother/sister," "Father/mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown separately in the matrix.

(6) Nonrelatives include the questionnaire categories "Roomer, boarder," "Partner, roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.

(7) Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in unit." The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the phrase "Persons in unit" is used. Tabulations of "Persons in unit" based on sample data are not necessarily the same due to differences in the procedures used to inflate sample population and housing data.

(8) A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

(9) Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," Held for occasional use," and "Other vacant." Tabulations of "Other vacant" include all categories not shown separately in the matrix.

(10) This aggregate, along with the relevant count will permit the computation of a mean. For example, the aggregate value for the owner-occupied noncondominum units will yield the mean or average value when divided by the number of specified owner-occupied noncondominium units, and the aggregate number of rooms for occupied and vacant year-round units yields the mean or average number of rooms. (See footnote 14 prior to computing mean value).

(11) The noncondominimum value distribution is restricted to certain kinds of "owner-occupied" or "vacant for sale only" units. The following are excluded from the tabulations on value for noncondominimum units:
- A. Units at an address with two or more units
- B. Units on 10 or more acres
- C. Units with a commercial establishment or medical office on the property
- D. Mobile homes or trailers

Value is tabulated for all owner-occupied and vacant-for-sale condominimum units.

(12) Contract rent is tabulated for all "renter-occupied" and "vacant-for-rent" units except 1-family houses on a property of 10 or more acres. Units tabulated in the "No cash rent" category are all occupied housing units reported as "No cash rent" except one-family houses on 10 or more acres.

(13) Lacking complete plumbing (facilities) for exclusive use includes: Complete plumbing (facilities) but also used by another household, some but not all plumbing facilities, or no plumbing facilities.

(14) Multiply the aggregate value by $250 to obtain the true value. The tabulation was scaled by a factor of $250 for tally purposes.

SECTION 3. HEALTH SERVICE AREAS

FORMAT: Within this section, data for each health service area is summarized by a set of 55 tables, presented on three sequential pages as follows:

1. Characteristics of Persons
2. Characteristics of Households and Families
3. Characteristics of Housing Units

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: North Central Connecticut Health Service Area. File codes are also listed with each area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

CONNECTICUT: 1980 CENSUS OF POPULATION AND HOUSING
Counts from Summary Tape File 1A, U. S. Bureau of the Census

12/81

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, Connecticut 06115
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from the questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonomous with a 100% sample. Information presented in this report is from the complete count, where each household was asked 19 basic questions on population and housing subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city block or a census tract. The tables presented in this report have been extracted from the first computer tape file of these summary tables. This file, called Summary Tape File 1A or STF 1A, contains the data from the complete count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(1) The count of households in the "complete count" (also called "100% sample") tabulations by definition equals the number of occupied housing units. In this document, the terms "households" and "occupied housing units" are used interchangeably.

(2) Vacant seasonal/migratory units are excluded from all other tabulation matrices.

(3) For the "complete-count" (also called 100% sample) tabulations, includes all persons in the category "other." For sample data, excludes those persons who have a write-in entry of an Asian & Pacific Islander group in the "Other" category.

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes: "Japanese," "Chinese," "Fillipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamantan," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "other" category.

(5) Relatives include: householder, spouse, and the questionnaire categories: "Son/daughter," "Brother/sister," "Father/mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown separately in the matrix.

(6) Nonrelatives include the questionnaire categories "Roomer, boarder," "Partner, roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.

(7) Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in unit." The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the phrase "Persons in unit" is used. Tabulations of "Persons in unit" based on sample data are not necessarily the same due to differences in the procedures used to inflate sample population and housing data.

(8) A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

(9) Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," Held for occasional use," and "Other vacant." Tabulations of "Other vacant" include all categories not shown separately in the matrix.

(10) This aggregate, along with the relevant count will permit the computation of a mean. For example, the aggregate value for the owner-occupied noncondominum units will yield the mean or average value when divided by the number of specified owner-occupied noncondominium units, and the aggregate number of rooms for occupied and vacant year-round units yields the mean or average number of rooms. (See footnote 14 prior to computing mean value).

(11) The noncondominimum value distribution is restricted to certain kinds of "owner-occupied" or "vacant for sale only" units. The following are excluded from the tabulations on value for noncondominimum units:
A. Units at an address with two or more units
B. Units on 10 or more acres
C. Units with a commercial establishment or medical office on the property
D. Mobile homes or trailers
Value is tabulated for all owner-occupied and vacant-for-sale condominimum units.

(12) Contract rent is tabulated for all "renter-occupied" and "vacant-for-rent" units except 1-family houses on a property of 10 or more acres. Units tabulated in the "No cash rent" category are all occupied housing units reported as "No cash rent" except one-family houses on 10 or more acres.

(13) Lacking complete plumbing (facilities) for exclusive use includes: Complete plumbing (facilities) but also used by another household, some but not all plumbing facilities, or no plumbing facilities.

(14) Multiply the aggregate value by $250 to obtain the true value. The tabulation was scaled by a factor of $250 for tally purposes.

SECTION 4. LABOR MARKET AREAS

FORMAT: Within this section, data for each labor market area is summarized by a set of 55 tables, presented on three sequential pages as follows:

1. Characteristics of Persons
2. Characteristics of Households and Families
3. Characteristics of Housing Units

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Ansonia Labor Market Area. File codes are also listed with each area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

CONNECTICUT: 1980 CENSUS OF POPULATION AND HOUSING
Counts from Summary Tape File 1A, U. S. Bureau of the Census

12/81

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, Connecticut 06115
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from the questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonomous with a 100% sample. Information presented in this report is from the complete count, where each household was asked 19 basic questions on population and housing subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city block or a census tract. The tables presented in this report have been extracted from the first computer tape file of these summary tables. This file, called Summary Tape File 1A or STF 1A, contains the data from the complete count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(1) The count of households in the "complete count" (also called "100% sample") tabulations by definition equals the number of occupied housing units. In this document, the terms "households" and "occupied housing units" are used interchangeably.

(2) Vacant seasonal/migratory units are excluded from all other tabulation matrices.

(3) For the "complete-count" (also called 100% sample) tabulations, includes all persons in the category "other." For sample data, excludes those persons who have a write-in entry of an Asian & Pacific Islander group in the "Other" category.

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes: "Japanese," "Chinese," "Fillipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamantan," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "other" category.

(5) Relatives include: householder, spouse, and the questionnaire categories: "Son/daughter," "Brother/sister," "Father/mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown separately in the matrix.

(6) Nonrelatives include the questionnaire categories "Roomer, boarder," "Partner, roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.

(7) Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in unit." The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the phrase "Persons in unit" is used. Tabulations of "Persons in unit" based on sample data are not necessarily the same due to differences in the procedures used to inflate sample population and housing data.

(8) A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

(9) Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," Held for occasional use," and "Other vacant." Tabulations of "Other vacant" include all categories not shown separately in the matrix.

(10) This aggregate, along with the relevant count will permit the computation of a mean. For example, the aggregate value for the owner-occupied noncondominum units will yield the mean or average value when divided by the number of specified owner-occupied noncondominium units, and the aggregate number of rooms for occupied and vacant year-round units yields the mean or average number of rooms. (See footnote 14 prior to computing mean value).

(11) The noncondominimum value distribution is restricted to certain kinds of "owner-occupied" or "vacant for sale only" units. The following are excluded from the tabulations on value for noncondominimum units:
   A. Units at an address with two or more units
   B. Units on 10 or more acres
   C. Units with a commercial establishment or medical office on the property
   D. Mobile homes or trailers
Value is tabulated for all owner-occupied and vacant-for-sale condominimum units.

(12) Contract rent is tabulated for all "renter-occupied" and "vacant-for-rent" units except 1-family houses on a property of 10 or more acres. Units tabulated in the "No cash rent" category are all occupied housing units reported as "No cash rent" except one-family houses on 10 or more acres.

(13) Lacking complete plumbing (facilities) for exclusive use includes: Complete plumbing (facilities) but also used by another household, some but not all plumbing facilities, or no plumbing facilities.

(14) Multiply the aggregate value by $250 to obtain the true value. The tabulation was scaled by a factor of $250 for tally purposes.

SECTION 5. COUNTIES

FORMAT: Within this section, data for each county is summarized by a set of 55 tables, presented on three sequential pages as follows:

1. Characteristics of Persons
2. Characteristics of Households and Families
3. Characteristics of Housing Units

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Hartford County. File codes are also listed with each area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

CONNECTICUT: 1980 CENSUS OF POPULATION AND HOUSING
Counts from Summary Tape File 1A, U. S. Bureau of the Census

12/81

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, Connecticut 06115
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from the questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonomous with a 100% sample. Information presented in this report is from the complete count, where each household was asked 19 basic questions on population and housing subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city block or a census tract. The tables presented in this report have been extracted from the first computer tape file of these summary tables. This file, called Summary Tape File 1A or STF 1A, contains the data from the complete count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(1) The count of households in the "complete count" (also called "100% sample") tabulations by definition equals the number of occupied housing units. In this document, the terms "households" and "occupied housing units" are used interchangeably.

(2) Vacant seasonal/migratory units are excluded from all other tabulation matrices.

(3) For the "complete-count" (also called 100% sample) tabulations, includes all persons in the category "other." For sample data, excludes those persons who have a write-in entry of an Asian & Pacific Islander group in the "Other" category.

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes: "Japanese," "Chinese," "Fillipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamantan," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "other" category.

(5) Relatives include: householder, spouse, and the questionnaire categories: "Son/daughter," "Brother/sister," "Father/mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown separately in the matrix.

(6) Nonrelatives include the questionnaire categories "Roomer, boarder," "Partner, roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.

(7) Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in unit." The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the phrase "Persons in unit" is used. Tabulations of "Persons in unit" based on sample data are not necessarily the same due to differences in the procedures used to inflate sample population and housing data.

(8) A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

(9) Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," Held for occasional use," and "Other vacant." Tabulations of "Other vacant" include all categories not shown separately in the matrix.

(10) This aggregate, along with the relevant count will permit the computation of a mean. For example, the aggregate value for the owner-occupied noncondominum units will yield the mean or average value when divided by the number of specified owner-occupied noncondominium units, and the aggregate number of rooms for occupied and vacant year-round units yields the mean or average number of rooms. (See footnote 14 prior to computing mean value).

(11) The noncondominimum value distribution is restricted to certain kinds of "owner-occupied" or "vacant for sale only" units. The following are excluded from the tabulations on value for noncondominimum units:
   A. Units at an address with two or more units
   B. Units on 10 or more acres
   C. Units with a commercial establishment or medical office on the property
   D. Mobile homes or trailers

Value is tabulated for all owner-occupied and vacant-for-sale condominimum units.

(12) Contract rent is tabulated for all "renter-occupied" and "vacant-for-rent" units except 1-family houses on a property of 10 or more acres. Units tabulated in the "No cash rent" category are all occupied housing units reported as "No cash rent" except one-family houses on 10 or more acres.

(13) Lacking complete plumbing (facilities) for exclusive use includes: Complete plumbing (facilities) but also used by another household, some but not all plumbing facilities, or no plumbing facilities.

(14) Multiply the aggregate value by $250 to obtain the true value. The tabulation was scaled by a factor of $250 for tally purposes.

SECTION 6. MUNICIPALITIES

FORMAT: Within this section, data for each municipality is summarized by a set of 55 tables, presented on three sequential pages as follows:

1. Characteristics of Persons
2. Characteristics of Households and Families
3. Characteristics of Housing Units

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Andover. File codes are also listed with each area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

CONNECTICUT: 1980 CENSUS OF POPULATION AND HOUSING
Counts from Summary Tape File 1A, U. S. Bureau of the Census

12/81

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, Connecticut 06115
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from the questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonomous with a 100% sample. Information presented in this report is from the complete count, where each household was asked 19 basic questions on population and housing subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city block or a census tract. The tables presented in this report have been extracted from the first computer tape file of these summary tables. This file, called Summary Tape File 1A or STF 1A, contains the data from the complete count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(1) The count of households in the "complete count" (also called "100% sample") tabulations by definition equals the number of occupied housing units. In this document, the terms "households" and "occupied housing units" are used interchangeably.

(2) Vacant seasonal/migratory units are excluded from all other tabulation matrices.

(3) For the "complete-count" (also called 100% sample) tabulations, includes all persons in the category "other." For sample data, excludes those persons who have a write-in entry of an Asian & Pacific Islander group in the "Other" category.

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes: "Japanese," "Chinese," "Fillipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamantan," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "other" category.

(5) Relatives include: householder, spouse, and the questionnaire categories: "Son/daughter," "Brother/sister," "Father/mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown separately in the matrix.

(6) Nonrelatives include the questionnaire categories "Roomer, boarder," "Partner, roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.

(7) Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in unit." The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the phrase "Persons in unit" is used. Tabulations of "Persons in unit" based on sample data are not necessarily the same due to differences in the procedures used to inflate sample population and housing data.

(8) A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

(9) Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," Held for occasional use," and "Other vacant." Tabulations of "Other vacant" include all categories not shown separately in the matrix.

(10) This aggregate, along with the relevant count will permit the computation of a mean. For example, the aggregate value for the owner-occupied noncondominum units will yield the mean or average value when divided by the number of specified owner-occupied noncondominium units, and the aggregate number of rooms for occupied and vacant year-round units yields the mean or average number of rooms. (See footnote 14 prior to computing mean value).

(11) The noncondominimum value distribution is restricted to certain kinds of "owner-occupied" or "vacant for sale only" units. The following are excluded from the tabulations on value for noncondominimum units:
- A. Units at an address with two or more units
- B. Units on 10 or more acres
- C. Units with a commercial establishment or medical office on the property
- D. Mobile homes or trailers

Value is tabulated for all owner-occupied and vacant-for-sale condominimum units.

(12) Contract rent is tabulated for all "renter-occupied" and "vacant-for-rent" units except 1-family houses on a property of 10 or more acres. Units tabulated in the "No cash rent" category are all occupied housing units reported as "No cash rent" except one-family houses on 10 or more acres.

(13) Lacking complete plumbing (facilities) for exclusive use includes: Complete plumbing (facilities) but also used by another household, some but not all plumbing facilities, or no plumbing facilities.

(14) Multiply the aggregate value by $250 to obtain the true value. The tabulation was scaled by a factor of $250 for tally purposes.

SECTION 7. NON-CONTIGUOUS BOROUGHS AND CITIES

FORMAT: Within this section, data for each non-contiguous borough and city is summarized by a set of 55 tables, presented on three sequential pages as follows:

1. Characteristics of Persons
2. Characteristics of Households and Families
3. Characteristics of Housing Units

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Willimantic City. File codes are also listed with each area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.
